Plant Care

Sunlight

The Aralia Snow Flake flourishes in medium indirect light. Too much direct sunlight can cause leaf burn, while too little light can lead to leggy growth.

Water

It prefers a moderate watering regimen. Allow the soil to dry out between waterings to prevent root rot.

Soil

A well-draining potting mix is crucial for its healthy growth. The plant prefers slightly acidic to neutral pH soil.

Repotting

Repotting should be done every two years or when the plant outgrows its current pot. Spring is the best time for repotting.

Common Problems and Remedies

Leaf Yellowing

Overwatering is a common cause. Reduce watering frequency and ensure the pot has good drainage.

Leggy Growth

Usually due to insufficient light. Move the plant to a brighter location.

Pests

Regularly check for common pests like spider mites, and treat with insecticidal soap or neem oil.
