## Plant Care

### Sunlight

The Philodendron Ceylon Golden thrives in medium to bright indirect light. Avoid direct sunlight, as it may scorch the leaves.

### Water

Water the plant moderately, allowing the top inch of soil to dry out between waterings. Overwatering can lead to root rot.

### Soil

Use a well-draining potting mix that retains moisture but allows excess water to drain away.

### Repotting

Repot the plant every 2-3 years or when it outgrows its current container. Choose a pot with drainage holes to prevent waterlogging.

# Common Problems and Remedies

## Yellowing leaves

This may be a sign of overwatering. Ensure proper drainage and reduce the frequency of watering.

## Drooping leaves

This may indicate underwatering. Increase the frequency of watering, ensuring the soil remains consistently moist but not waterlogged.

## Pests

Keep an eye out for common pests such as mealybugs, spider mites, and aphids. Treat infestations with insecticidal soap or neem oil.
